

ABSTRACT

A waterproof portable bathing chair and footrest for use by a mobility-impaired person while taking a bath. The
5 bathing chair is used to balance and support the user, and prevent the user from slipping while getting into and out of a bathtub, and also to cushion the user while relaxing in the bath. The bathing chair includes a cushioning seat, an upper body cushioning device attached to the seat and a headrest
10 attached to the upper body cushioning device for comfortably supporting the neck and back of the user while bathing. A pair of armrests are coupled to the seat and fastened around a pair of handrails on the tub, for securing the user between the armrests on the seat cushion. The handrails, along with
15 the footrest, provide the user with balance and safety while getting into and out of the bathtub.
